

**SUMMER
SPRINGBOARD**
Look Inward. Go Upward.

CYBERSECURITY INFOSHEET

**New student admissions for
Summer 2026 are open**

2-Week Course

This is a two-week program where you'll focus on one course for the entire duration.

Program Highlights

- Discover cybersecurity basics, key terms and environment set up
- Learn Encryption, Hashing, and Encoding Fundamentals
- Understand common security failures
- Group challenge using Open Source Intelligence "OSINT"
- Students will work collaboratively in a live hacking challenge
- Explore career possibilities such as security analyst, ethical hacker, digital forensic investigator, or Chief Information Security Officer (CISO)
- Coding experience helpful, but not required

2026 Dates

MIT Campus

- Session 2: July 5 - July 17

Academic Program Overview

Cybersecurity is a rapidly growing field that plays a vital role worldwide. It requires bright minds to tackle major global challenges, and corporations are hiring cybersecurity professionals at a fast pace. The Summer Springboard Pre-College Program in Cybersecurity introduces students to foundational concepts, commonly used tools, key technical skills, and potential career pathways. Students will engage in hands-on exercises and fun hacking challenges to test their knowledge, leaving the program with technical skills and creative thinking applicable across university courses and professional industries.

Excursions

Past excursions have included visits to MIT's Information Security and Technology facilities and Amazon's data centers, where students spoke with staff about how they protect students, faculty, and company systems from cyber threats, among other topics.

Instructors

Bobby Rauch and Brady McNitt

Bobby is a Boston-based offensive security engineer, red teamer at a Fortune 500 company, and security researcher. He has discovered high-severity vulnerabilities in major Fortune 500 firms, including Microsoft, Apple, and Oracle. His work has been featured by the Boston Globe, Brian Krebs, Bleeping Computer, Ars Technica, and other major tech outlets. His technical blog posts have over 200,000 reads, and he has spoken at global offensive security conferences such as Hardware.io, m0lecon Turin, and BSides London. He designed and recorded an introductory cybersecurity course for LinkedIn Learning and mentors people entering the cybersecurity field. Bobby holds a Computer Science bachelor's degree from MIT and the OSCP and OSWE certifications.

Brady has over 15 years of experience in security and technology, focusing on securing and enabling business at development speed. He has provided guidance and expertise across public and private sectors, including financial services, higher education, and local and state government. He holds a bachelor's degree from Louisiana State University and SANS certifications, including GPEN and GWAPT. He is an active member of OWASP, InfraGard, and the SANS GIAC Advisory Board. In his spare time, he competes in cybersecurity CTFs, most recently the SANS NetWars Tournament of Champions, and attends training, conferences, and meetups such as Black Hat, DEFCON, and BSides. Brady is passionate about mentoring and preparing the next generation for evolving cybersecurity challenges.

Tuition Information:

Residential Students:

- **Includes:** all meals, lodging, excursions, academic course, weekend excursions
- **Excludes:** optional airport pickup and drop off service (available for an additional fee)
- **Price:** \$6,798

Commuter Students:

- **Includes:** lunch, academic course, excursions, programming from 9am to 5pm, Monday-Friday
- **Excludes:** lodging, breakfast, dinner, weekend excursions
 - Weekend excursions can be added on for \$125 per day
- **Price:** \$3,498

Supplements:

- **Application fee:** Starting at \$99 (mandatory, non-refundable)
- **Tuition Protection Plan:** Allows for cancellation for any reason up until the day of the program. Click [here](#) for more info.
