

**SUMMER
SPRINGBOARD**
Look Inward. Go Upward.

Environmental Studies Infosheet

New student admissions for
Summer 2023 are open.

Program Highlights

- Gain an in-depth look at environmental issues that affect society today
- Examine environmental issues from a political, scientific, economic, global and social perspective
- Analyze the connection between the earth's natural resources and the impact of human activities on them
- Using case studies, investigate current environmental issues and possible solutions for resource conservation

2023 Dates

UC Berkeley

- Session 1: June 18 - June 30
- Session 2: July 02 - July 14
- Session 3: July 16 - July 28

Academic Program Overview

Interested in a “Green Career”? Our program in Environmental Studies offers an interdisciplinary look at issues pertaining to ecology and sustainability, without focusing on the scientific side. Focusing on how humans impact the environment, this course gives students the tools to gain a broader understanding of the growing number of issues that affect our environment. Blessed with miles of coastline, students will also have the unique opportunity to study the Bay Area's diverse ecosystems. Showing various career paths, from environmental science to ecological agriculture, this course gives students a better understanding of where a green career can lead.

Excursions

Students will meet with habitat restoration experts from a local nonprofit working to protect and restore the San Francisco Bay. Students will also visit an ecological institute for a hands-on experience to better understand the impacts of climate change.

Instructors

TBA

Courses are taught by accomplished and passionate faculty recruited from many area colleges, universities and professional forums. Each faculty member is selected for their subject area expertise and proven ability to both challenge and captivate students.
