

Psychology & Neuroscience

Program Highlights

- Uncover the mystery of how the mind works, and examine the connection between the brain and human behavior.
- Listen, assess and suggest treatments for your patients during a clinical simulation.
- Develop solutions to the complex questions of human behavior and experience through hands-on activities.
- Interact with clinical psychologists, neurologists and researchers who are experts in this specialized field.

- July 5-July 17, 2020
- July 19-July 31, 2020

UC Berkeley

- June 21-July 3, 2020
- July 5-July 17, 2020
- July 19-July 31, 2020

Boston

- July 5-July 17, 2020
- July 19-July 31, 2020

Academic Course Overview

Through psychology simulations and hands-on neurology workshops, you will explore the relationships between the brain and human behavior. Whether you are interested in the physical aspect of the brain and central nervous system or more intrigued by human behavior and thought processes, connect with professionals that have a background in both psychology and neuroscience. This insight helps students reflect on which areas within this specific medical field would be a good fit for them.

Guest Speakers & Excursions Excursions may include visits to local medical and research facilities.

Instructors

Courses are taught by accomplished and passionate faculty recruited from many area colleges, universities and professional forums. Each faculty member is selected for their subject area expertise and proven ability to both challenge and captivate students.

Sample Schedule from Past Year

This is only to provide a general idea of the class structure. The exact sequence of lessons will change based on availability of guest speakers and on companies that can host our students.
